

ASE 161M

Aircraft Design Laboratory

Spring Summer Fall Year: _____

Instructor:

This course contributes significantly to these ASE program outcomes:

- [2] The ability to identify, formulate, and solve problems in aerospace structures, air-breathing and rocket propulsion, flight dynamics, and flight control systems using modern engineering techniques and tools (e, k)
- [3] The ability to analyze and perform preliminary design of components of aerospace structures, air-breathing and rocket propulsion systems, and flight control systems using modern engineering techniques and tools (c, k)
- [4] The ability to work on a multi-disciplinary team to perform conceptual design of aircraft or spacecraft that will meet a set of mission requirements (c, d)
- [6] The ability to communicate effectively in oral, written, and graphical form (g).
- [7] The ability to recognize the impact of engineering systems on the environment and society and an understanding of professional and ethical responsibility (f, h, j)

Assignment (circle one): Homework #___ Exam #___ Final Project Other

If Other, explain: _____
